**EXAMINATION REPORT - SEPARATE SHEET** 

#### AD SECTION I

Reference is made to the following documents:

D1: EP-A-0421495 (see columns 1-10; figures);

Although claims 1-21, 25 seem in principle to fulfill the requirements of Articles 33.2, 33.3 and 33.4 PCT, the subject-matter of claims 22-24 do not appear to be clear enough (contrary to Article 6 PCT) and therefore the present application does not fulfill the requirements of Article 33.2 PCT because claims 22-24 are not new over D1.

#### AD SECTION V

#### Α-NOVELTY

The present application does not satisfy the criterion set forth in Article 33(2) PCT because the subject-matter of independent Claim 22 and dependent claims 23 and 24 is not new in respect of prior art as defined in the regulations (Rule 64(1)-(3) PCT)(see section VIII).

Indeed, D1, which is considered to represent the most relevant state of the art, discloses an innerspring assembly such as claimed in claims 22-24, since claims 22 and 23 do not contain any technical features in relation to the innerspring assembly per se.

The features of claim 24 are known from D1.

An innerspring assembly is not rendered novel merely by the fact that it product by means of a method according to claims 1-21 which seems to be novel over D1.

### **AD SECTION VII**

The features of the claims have not been provided with reference signs placed in 1parentheses (Rule 6.2(b) PCT).

# INTERNATIONAL PRELIMINARY

International application No. PCT/GB00/00917

**EXAMINATION REPORT - SEPARATE SHEET** 

### **AD SECTION VIII**

- Claims 22 and 23 are product-claims relating to a method of manufacturing an 1innerspring assembly rather than clearly defining the product in terms of its technical features. The intended limitations are therefore not clear from these claim, contrary to the requirements of Article 6 PCT. Therefore, these claims become not new over the prior art (see section V)
- The terms "relatively high" and "relatively low" used in claim 25 are vague and 2unclear and leave the reader in doubt as to the meaning of the technical features to which they refer, thereby rendering the definition of the subject-matter of said claim unclear (Article 6 PCT).
- Claims 12-21, 23-25 are not supported by the description as required by Article 6 3-PCT.
